VOLUME CONTENTS

Number 1

V. Busuioc and D. Iftimie	1	Global existence and uniqueness of solutions for the equations of third grade fluids
K. Vajravelu and B.V.R. Kumar	13	Analytical and numerical solutions of a coupled non-linear system arising in a three-dimensional rotating flow
S. Banerjee, P. Saha and A.R. Chowdhury	25	On the application of adaptive control and phase synchronization in non-linear fluid dynamics
Q. Bi	33	Dynamical analysis of two coupled parametrically excited van der Pol oscillators
R. Quintanilla	55	Comparison arguments and decay estimates in non-linear viscoelasticity
A.A. Barhorst	63	Systematic closed form modeling of hybrid parameter multiple body systems
M.S. Fofana and P.B. Ryba	79	Parametric stability of non-linear time delay equations
A.H.P. van der Burgh and Hartono	93	Rain-wind-induced vibrations of a simple oscillator
D.W. Barclay	101	Shock calculations for axially symmetric shear wave propagation in a hyperelastic incompressible solid
A.A. Barhorst	123	On the efficacy of pseudo-coordinates—Part 1: moving interior constraints
A.A. Barhorst	137	On the efficacy of pseudo-coordinates—Part 2: moving boundary constraints
R. Usha and R. Ravindran	153	Analysis of cooling of a conducting fluid film of non-uniform thickness on a rotating disk
P.G. Siddheshwar and S. Pranesh	165	An analytical study of linear and non-linear convection in Boussinesq–Stokes suspensions

Number 2

	173	Publisher's note
A. Tabiei and I. Ivanov	175	Materially and geometrically non-linear woven composite micro-mechanical model with failure for finite element simulations
L. Xinye, C. Yushu and W. Zhiqiang	189	Non-linear normal modes and their bifurcation of a class of systems with three double of pure imaginary roots and dual internal resonances

S. Baek and A.R. Srinivasa	201	Diffusion of a fluid through an elastic solid undergoing large deformation
M.M. Carroll	219	A representation theorem for volume-preserving transformations
C. Fetecau	225	Analytical solutions for non-Newtonian fluid flows in pipe-like domains
K. Kanaka Durga and M. Ramakrishna	233	A new multigrid algorithm for non-linear equations in conjunction with time-marching procedures
I. Samohýl and W. Pabst	247	Phase equilibrium in non-fluids and non-fluid mixtures
E. Momoniat and S. Abelman	265	An investigation into the spreading of a thin liquid drop under gravity on a slowly rotating disk
S.-J. Liao	271	An analytic approximate approach for free oscillations of self-excited systems
T.I. Zohdi	281	Staggering error control of a class of inelastic processes in random microheterogeneous solids
E. Kanso and P. Papadopoulos	299	Dynamics of pseudo-rigid ball impact on rigid foundation
T. Bakri, R. Nabergoj, A. Tondl and F. Verhulst	311	Parametric excitation in non-linear dynamics
G. Saccomandi	331	Elastic rods, Weierstrass' theory and special travelling waves solutions with compact support
G. Muscolino, G. Ricciardi and P. Cacciola	341	Erratum to "Monte Carlo simulation in the stochastic analysis of non-linear systems under external stationary Poisson white noise input" [Int. J. Non-Linear Mech. 38 (2003) 1269–1283]

Number 3

C. Desceliers and C. Soize	343	Non-linear viscoelastodynamic equations of three-dimensional rotating structures in finite displacement and finite element discretization
E. Baesu, R.E. Rudd, J. Belak and M. McElfresh	369	Continuum modeling of cell membranes
L.-I. Palade, J.R. Walton and A. Farina	379	A new constitutive equation that models extensional flow strain hardening based on evolving natural configurations: stability analysis
M.L. Gandarias, M. Torrisi and A. Valenti	389	Symmetry classification and optimal systems of a non-linear wave equation

H.W. Haslach and J.D. Humphrey	399	Dynamics of biological soft tissue and rubber: internally pressurized spherical membranes surrounded by a fluid
I.I. Blekhman and P.S. Landa	421	Conjugate resonances and bifurcations in nonlinear systems under biharmonical excitation
K.-Y. Kung, X. Cheng-Hsing Hsu and H.L. Chiang	427	Transient mixed convection flow of a second grade viscoelastic fluid past an inclined backward facing step
M.E. Erdoğan	441	Diffusion of a line vortex in a second-order fluid
E. Momoniat	447	Propogation of waves in a linear elastic fluid
P.M. Mariano, C.M. Casciola and E. De Angelis	457	Substructural interactions and transport in polymer flows
A. Sarkar and M.P. Paidoussis	467	A cantilever conveying fluid: coherent modes versus beam modes
A.N. Gent and K.-C. Hua	483	Torsional instability of stretched rubber cylinders
D.V. Ramani, W.L. Keith and R.H. Rand	491	Perturbation solution for secondary bifurcation in the quadratically-damped Mathieu equation
J.F. Wilson and E.G. Callis	503	The dynamics of loosely jointed structures

Number 4

V.H. Tüzel and H.A. Erbay	515	The dynamic response of an incompressible non-linearly elastic membrane tube subjected to a dynamic extension
Ch. Tsakmakis and A. Willuweit	539	A comparative study of kinematic hardening rules at finite deformations
K.W. MacEwen	555	The follower load problem and bifurcation to periodic motions
W.Q. Zhu	569	Lyapunov exponent and stochastic stability of quasi-non-integrable Hamiltonian systems
C. Ferrario, A. Passerini and G. Thäter	581	Generalization of the Lorenz model to the two-dimensional convection of second-grade fluids
R. Khiri	593	Coriolis effect on convection for a low Prandtl number fluid
I. Ario	605	Homoclinic bifurcation and chaos attractor in elastic two-bar truss
V.L. Popov	619	Nanomachines: a general approach to inducing a directed motion at the atomic level
S. Ching Quek, A.M. Waas, K.W. Shahwan and V. Agaram	635	Compressive response and failure of braided textile composites: Part 1—experiments

S. Ching Quek, A. Waas, K.W. Shahwan and V. Agaram 649 Compressive response and failure of braided textile composites: Part 2—computations

M. Yürüsoy 665 Similarity solutions for creeping flow and heat transfer in second grade fluids

U. von Wagner 673 Non-linear longitudinal vibrations of non-slender piezoceramic rods

P.M. Mariano, C.M. Casciola and E. De Angelis 689 Erratum to "Substructural interactions and transport in polymer flows" [Int. J. Non-Linear Mech. 39 (2004) 457–465]

Number 5

H.-C. Chung, J. Liang, S. Kushiyama and M. Shinozuka 691 Digital image processing for non-linear system identification

V.P. Panoskaltsis, S. Bahuguna and D. Soldatos 709 On the thermomechanical modeling of shape memory alloys

L. Librescu, D. Hasanyan and D.R. Ambur 723 Electromagnetically conducting elastic plates in a magnetic field: modeling and dynamic implications

M. Yaman and S. Sen 741 The analysis of the orientation effect of non-linear flexible systems on performance of the pendulum absorber

U. von Wagner 753 On non-linear stochastic dynamics of quarter car models

T. Hayat and K. Hutter 767 Rotating flow of a second-order fluid on a porous plate

R.P. Agarwal and D. O'Regan 779 An infinite interval problem arising in circularly symmetric deformations of shallow membrane caps

K.H. Shirazi and M.H. Ghaffari-Saadat 785 Chaotic motion in a class of asymmetrical Kelvin type gyrostat satellite

A.-R.A. Khaled and K. Vafai 795 The effect of the slip condition on Stokes and Couette flows due to an oscillating wall: exact solutions

T.R. Mahapatra and A.S. Gupta 811 Stagnation-point flow of a viscoelastic fluid towards a stretching surface

A. Tondl and R. Nabergoj 821 The effect of parametric excitation on a self-excited three-mass system

P.K. Currie 833 The Attainable Region of strain-invariant space for elastic materials

G. Kang, Q. Gao and X. Yang 843 Uniaxial and non-proportionally multiaxial ratcheting of SS304 stainless steel at room temperature: experiments and simulations

B.S. Wu and C.W. Lim 859 Large amplitude non-linear oscillations of a general conservative system

Number 6

R. Haiwu, M. Guang, W. Xiangdong, X. Wei and F. Tong 871 Response statistic of strongly non-linear oscillator to combined deterministic and random excitation

W.Q. Zhu and Z.L. Huang 879 Stochastic stabilization of quasi non-integrable Hamiltonian systems

A. Post and W. Stuiver 897 Modeling non-linear oscillators: a new approach

Y.-H. Zhou and J. Wang 909 Vibration control of piezoelectric beam-type plates with geometrically nonlinear deformation

O.M. O'Reilly and M.H. Tan 921 Steady motions of an axisymmetric satellite: an atlas of their bifurcations

C. Babaoglu and S. Erbay 941 Two-dimensional wave packets in an elastic solid with couple stresses

Z. Huang 951 The equilibrium equations and constitutive equations of the growing deformable body in the framework of continuum theory

S. Murata and K. Nozaki 963 Renormalization group symmetry method and gas dynamics

F. Peyraut 969 Loading restrictions for the Blatz–Ko hyperelastic model—application to a finite element analysis

B.I. Epureanu, L.S. Tang and M.P. Païdoussis 977 Coherent structures and their influence on the dynamics of aeroelastic panels

S. Saadat, G.D. Buckner, T. Furukawa and M.N. Noori 993 An intelligent parameter varying (IPV) approach for non-linear system identification of base excited structures

M.S. Mongiovì and R.A. Peruzza 1005 Attenuation of the fourth sound in liquid helium II via extended thermodynamics

D.P. Mason and E. Momoniat 1013 Axisymmetric spreading of a thin liquid drop with suction or blowing at the horizontal base

T. Hayat, Y. Wang and K. Hutter 1027 Hall effects on the unsteady hydromagnetic oscillatory flow of a second-grade fluid

J.D. Clayton, D.J. Bammann and D.L. McDowell 1039 Anholonomic configuration spaces and metric tensors in finite elastoplasticity

K. Zakaria 1051 Wilton ripples between two uniform streaming magnetic fluids

Number 7

S. Abel, P.H. Veena, K. Rajgopal and V.K. Pravin	1067	Non-Newtonian magnetohydrodynamic flow over a stretching surface with heat and mass transfer
A.F. Vakakis and R.H. Rand	1079	Non-linear dynamics of a system of coupled oscillators with essential stiffness non-linearities
G.M. Kulikov and S.V. Plotnikova	1093	Finite deformation plate theory and large rigid-body motions
S.F. Masri, J.P. Caffrey, T.K. Caughey, A.W. Smyth and A.G. Chassiakos	1111	Identification of the state equation in complex non-linear systems
E. Kanso and P. Papadopoulos	1129	Pseudo-rigid ball impact on an oscillating rigid foundation
R.P. Pacheco and V. Steffen Jr.	1147	On the identification of non-linear mechanical systems using orthogonal functions
J. Kuang, P.A. Meehan, A.Y.T. Leung and S. Tan	1161	Nonlinear dynamics of a satellite with deployable solar panel arrays
D.M. Haughton	1181	On non-linear stability in unconstrained non-linear elasticity
D.J. Steigmann	1193	Equilibrium theory for magnetic elastomers and magnetoelastic membranes
A. Hasanov	1217	Integral convexity argument for plasticity function and monotonicity of iteration process for elasto-plastic problems
R. Nazar, N. Amin, D. Filip and I. Pop	1227	Stagnation point flow of a micropolar fluid towards a stretching sheet
K.-Y. Kung, C.-H. Hsu and H.-L. Chiang	1237	Erratum to "Transient mixed convection flow of a second grade viscoelastic fluid past an inclined backward facing step" [Int. J. Non-Linear Mech. 39 (2003) 427–439]

Number 8

T.G. Myers, H.X. Liang and B. Wetton	1239	The stability and flow of a rivulet driven by interfacial shear and gravity
M.L. Szwabowicz and W. Pietraszkiewicz	1251	Determination of the deformed position of a thin shell from surface strains and height function
K. Sadeghy and M. Sharifi	1265	Local similarity solution for the flow of a "second-grade" viscoelastic fluid above a moving plate
L.-I. Palade	1275	An integral constitutive law for viscoelastic fluids based on the concept of evolving natural configurations: stability analysis

A.V. Porubov and F. Pastrone	1289	Non-linear bell-shaped and kink-shaped strain waves in microstructured solids
S. Baek and A.R. Srinivasa	1301	Modeling of the pH-sensitive behavior of an ionic gel in the presence of diffusion
G.N. Jazar	1319	Stability chart of parametric vibrating systems using energy-rate method
U. Akyuz	1333	Separation at the interface of non-linearly elastic spinning tube–rigid shaft subjected to circumferential shear
M.S. Alam	1343	A modified and compact form of Krylov–Bogoliubov–Mitropolskii unified method for solving an *n*th order non-linear differential equation
A.V. Porubov, G.A. Maugin and V.V. Mareev	1359	Localization of two-dimensional non-linear strain waves in a plate
P.M. Jordan, A. Puri and G. Boros	1371	On a new exact solution to Stokes' first problem for Maxwell fluids
M.E. Erdoğan and C.E. İmrak	1379	Effects of the side walls on the unsteady flow of a second-grade fluid in a duct of uniform cross-section
H. Tanrıöver and E. Şenocak	1385	Large deflection analysis of unsymmetrically laminated composite plates: analytical-numerical type approach

Number 9

Y.K. Lin and G.Q. Cai	1393	Guest editorial
S.H. Crandall	1395	On using non-Gaussian distributions to perform statistical linearization
G. Gao and Y. Yong	1407	Partial-average-based equations of incompressible turbulent flow
Z.L. Huang and W.Q. Zhu	1421	Stochastic averaging of quasi-integrable Hamiltonian systems under combined harmonic and white noise excitations
S.J. Li, Y. Suzuki and M. Noori	1435	Improvement of parameter estimation for non-linear hysteretic systems with slip by a fast Bayesian bootstrap filter
H.J. Pradlwarter and G.I. Schuëller	1447	Excursion probabilities of non-linear systems
A.W. Smyth and S.F. Masri	1453	The robustness of an efficient probabilistic data-based tool for simulating the non-stationary response of non-linear systems
C. Wu and G.Q. Cai	1463	Effects of excitation probability distribution on system responses

W. Xu, Q. He, T. Fang and H. Rong	1473	Stochastic bifurcation in duffing system subject to harmonic excitation and in presence of random noise
J.N. Yang and S. Lin	1481	On-line identification of non-linear hysteretic structures using an adaptive tracking technique
J.S. Yu and Y.K. Lin	1493	Numerical path integration of a non-homogeneous Markov process
R.R. Zhang, L. VanDemark, J. Liang and Y. Hu	1501	On estimating site damping with soil non-linearity from earthquake recordings
X.Y. Zheng and C.Y. Liaw	1519	Non-linear frequency-domain analysis of jack-up platforms
W.Q. Zhu and M.L. Deng	1535	Optimal bounded control for minimizing the response of quasi-integrable Hamiltonian systems
